This report is compiled in L^AT_EX, originally developed by Leslie Lamport, based on Donald Knuth's T_EX. The main text is written in *Computer Modern* pt 11, designed by Donald Knuth. Flowcharts and diagrams are made using Microsoft Visio, Inkscape and Tikz, a T_EXpackage for generating graphics.

STUDENT REPORT

Title:

Flexible Equalizer for use in active speaker systems

Abstract:

This is a box for an Abstract waiting to be written.

Theme:

Digital Real-Time Signal Processing

Project Period:

6. Semester

Project Group:

16gr514

Participants:

Kasper Kiis Jensen

Poul Hoang

Mikkel Krogh Simonsen

Supervisor:

Sofus

External Contact:

Copies: 5

Page Numbers: xx

Date of Completion:

May 26, 2016

The content of this report is freely available, but publication (with reference) may only be pursued due to agreement with the author.

Contents

Part I	Prealysis	1
1	Introduction	2
2	Problem Analysis	3
2.1	Problem Statement	3
3	Technical Analysis	4
3.1	Gate	4
3.2	Equalizer	4
3.3	Limiter	4
3.4	why a DSP?	4
3.5	Part Conclusion	4
Part II	Design & implementation	5
4	Overview	6
5	Requirements	7
6	Choice of hardware	8
7	Interface	9
8	Total Overview	10
9	Gate	11
9.1	Requirements & Interface	11
9.2	Design	11
9.3	Simulation	11
9.4	Implementation	11
9.5	Test	11
10	Equalizer	12
10.1	Requirements & Interface	12
10.2	Design	12
10.3	Simulation	12
10.4	Implementation	12
10.5	Test	12
11	Limiter	13

11.1	Requirements & Interface	13
11.2	Design	13
11.3	Simulation	13
11.4	Implementation	13
11.5	Test	13
Part III	Acceptance Test & Conclusion	14
12	Conclusion	15
13	Optimization	16
14	Perspectivation	17
15	Discussion	18
Part IV	Appendix	19
A	Appendix	20

Preface

This report has been carried out during spring of 2016 as a 6. semester Electronics and IT student bachelor project at Aalborg University by group 16grXXX. The project concerns the development of Something extremely awesome.

Aalborg University, May 27, 2016

Part I

Preanalysis

1 | Introduction

2 | Problem Analysis

2.1 Problem Statement

3 | Technical Analysis

3.1 Gate

3.2 Equalizer

3.3 Limiter

3.4 why a DSP?

3.5 Part Conclusion

Part II

Design & implementation

4 | Overview

5 | Requirements

6 | Choice of hardware

7 | Interface

8 | Total Overview

9 | Gate

9.1 Requirements & Interface

9.2 Design

9.3 Simulation

9.4 Implementation

9.5 Test

10 | Equalizer

10.1 Requirements & Interface

10.2 Design

10.3 Simulation

10.4 Implementation

10.5 Test

11 | Limiter

11.1 Requirements & Interface

11.2 Design

11.3 Simulation

11.4 Implementation

11.5 Test

Part III

Acceptance Test & Conclusion

12 | Conclusion

13 | Optimization

14 | Perspectivation

15 | Discussion

Part IV

Appendix

Appendix

A | Appendix

Somehting nice to know
